AUGUST HEALTH EDUCATION AND WELLNESS PROGRAM—VITAMINS AND MINERALS: Nutrients are essential for life, health, growth and vigor. August's packet will look at vitamins and minerals and how they affect our health and well being. Information will include why we need them, chief functions in the body, good food sources, deficiency symptoms, and whether supplements are needed. While every nutrient is uniquely essential, each functions most effectively in combination and in interrelationships with others. Although present in only minute quantities in the body, vitamins and minerals act as catalysts and antioxidants and assist in biochemical transformations. They keep your body functioning at optimum levels and help prevent disease. Special emphasis will be placed on antioxidants (C, E, beta carotene) and their role in cancer and heart disease prevention, and folic acid and its relationship to homocysteine levels and heart disease. Packets will be available at all medical facilities in August and upon request to Carol Roth, BOC-005, 867-3414. (JJ-C)

CPR CLASS SURVEY: The KSC-Biomedical Office is taking a poll to see how many employees at the Kennedy Space Center and Cape Canaveral Air Station would be interested in receiving training to become certified by the American Heart Association in adult cardiopulmonary resuscitation (CPR).
